## News Release

# Hypertronics Announces Pro Board Technology Services Corporation as a New Distributor in the Philippines

**Hudson, MA (March 16, 2009)** Hypertronics Corporation, a Smiths Interconnect business and world-leading provider of high performance interconnect solutions for the most demanding applications, today announced a distribution agreement with Pro Board Technology Services Corporation. Based in the Philippines, Pro Board Technology Services, [www.pbts-tech.com](http://www.pbts-tech.com), (PBTS) has been established as an authorized Hypertronics distributor focused on supply chain assistance and engineering expertise aimed at providing enhanced customer service and support. This relationship with PBTS strengthens Hypertronics already extensive global distribution network, providing customers in the Philippines with a local outlet to acquire Hypertronics interconnect solutions. With the addition of PBTS, Hypertronics customers in the Philippines will have local access to sales and design support as well as improved delivery flexibility.

In the near future, PBTS plans to become certified for the assembly of Hypertronics connectors and to be a stocking distributor, profiling component inventory which will enable them to assemble a broad mix of connectors from available on-hand inventory.

Since establishing business in 2006, PBTS has become a valued partner and supplier to the Electronic, Test & Development and Semiconductor Assembly industries in the Philippines. Initially PBTS specialized in the repair of industrial electronic printed circuit boards that control plant machinery and now is recognized as industry experts on numerous driver boards, controllers, various power supplies, CPU, and Interfaces. Its clients offerings include custom solutions for semiconductor manufacturing operations and test/development engineering applications.

“We are excited to have Pro Board Technology’s expertise to distribute our products to customers in the Philippines,” stated Vadim Radunsky, President Hypertronics Corp. “Their already established relationships with leading companies in the electronics and manufacturing markets make them an ideal distribution partner for Hypertronics’ ultra reliable interconnect solutions.”

## About Hypertronics Corporation

Hypertronics, based in Hudson, Massachusetts, has been a leader in the design, manufacturing and distribution of specialty connectors for the electronics industry since 1970. Its Hypertac® technology is renowned for delivering unfailing performance in high-reliability applications in the medical, military/aerospace, test and measurement and industrial market segments. The company offers a wide range of standard catalog products as well as custom-designed connectors for more specific application needs and performance requirements. Hypertronics is a wholly owned subsidiary of Smiths Interconnect. More information about Hypertronics products and solution offerings can be found at [www.hypertronics.com](http://www.hypertronics.com).

## About Smiths Interconnect

Smiths Interconnect, part of the global technology business Smiths Group, designs and manufactures specialized electronic and radio frequency products that connect protect and control critical systems for the wireless telecommunications, aerospace, defense, space and medical markets.
