Hypertronics Introducing a New Online Pricing Portal Allowing for Easy Price Quotes

“The Newly Designed Interactive Hypertronics Website Now Features Pricing on Standard Products”

Hudson, MA March 18, 2010) Hypertronics Corporation, a Smiths Interconnect business and world-leading provider of high performance interconnect solutions for the most demanding applications, announced today the release of a newly designed pricing portal on its website, www.hypertronics.com.

The new pricing portal will allow users to attain price quotes on standard catalog products 24/7 in real time eliminating the time lapse between the request for quote and proposal. This new feature offers international customers the ability to obtain pricing when needed within their time structure. The Hypertronics pricing portal is interactive and easy to use, allowing users to find the desired product pricing by entering part numbers, or by using the fully integrated 3D Configuration tool. Also, the pricing portal is linked in with Hypertronics StockCheck allowing users to see inventory levels in distribution sites for quick turn around.

3D Config is a configuration tool that allows users to design a part for their exact needs and provide the 3D models and 2D drawings. StockCheck is a detailed search engine that allows the viewer to locate any product and find the availability within Hypertronics’ distributors’ inventory.

“We are excited to launch this new pricing module” Vadim Radunsky, President of Hypertronics, stated. “This new tool will allow our customers globally to get pricing on many of our standard products in real time. We have put great effort into increasing our presence on the web as it proves to be the venue customers are turning to for quick response, and will continue to do so.”

About Hypertronics Corporation

Hypertronics, based in Hudson, Massachusetts, has been a leader in the design, manufacturing and distribution of specialty connectors for the electronics industry since 1970. Its Hypertac® technology is

renowned for delivering unfailing performance in high-reliability applications in the medical, military/aerospace, test and measurement and industrial market segments. The company offers a wide range of standard catalog products as well as custom-designed connectors for more specific application needs and performance requirements. Hypertronics is a wholly owned subsidiary of Smiths Interconnect. More information about Hypertronics products and solution offerings can be found at www.hypertronics.com.
